WORK EXPERIENCE (HORIZONTAL TIMELINE)

Zwapy Private Limited | Co-Founder, CTO, COO & Executive Lead2026 – Present

- Directing end-to-end technical system architecture, product roadmaps, and full-stack front-end engineering using Next.js, React, Tailwind CSS, and cloud databases (Supabase/Firebase).
- Spearheading company-wide operational workflows, agile sprint cadences, and strategic talent placement pipelines connecting universities to industry.

Parinayam Connect Private Limited | Co-Founder, CTO, COO, CMO & Executive Lead2026 – Present

- Engineering the core platform infrastructure, multi-tier profile verification engines, and secure high-concurrency database architecture while leading operations.
- Formulating and executing multi-channel Go-To-Market (GTM) strategies, brand identity, and acquisition funnels as Chief Marketing Officer (CMO).

FEATURED PROJECTS (MORPHING BENTO GRID)

1. Autonomous AI Interview System
Core AI Engineering Project

Full-scale automated mock interview platform featuring real-time speech-to-text, dynamic contextual question adaptation, video/audio stream processing, and multi-metric candidate assessment.

Next.jsExpressWebRTCWhisper APITailwind

2. Zwapy Career & Skill Platform
Venture Platform Product

Integrated career development ecosystem with verified skill badges, dynamic interactive portfolios, and automated enterprise recruitment match engines.

Next.jsReactTypeScriptSupabaseTailwind

3. Parinayam Connect Portal
Community Matchmaking Portal

Secure matchmaking and community discovery network with end-to-end credential authentication, low-latency filter algorithms, and real-time communication protocols.

Next.jsNode.jsExpressPostgreSQLREST APIs

4. IoT Smart Water Flow Management
Embedded Systems & Hardware IoT

Automated fluid metering architecture utilizing ultrasonic sensors to identify anomalies and trigger automatic solenoid shut-offs with real-time cloud telemetry.

C/C++MicrocontrollersUltrasonic SensorsIoT Cloud

TOP SKILLS & TECH STACK (SVG CIRCUIT LINES)

Core Languages:	JavaScript (ES6+), TypeScript, Python, C/C++, HTML5, CSS3, SQL
Web & Frameworks:	React.js, Next.js, Node.js, Express.js, Tailwind CSS, Shadcn/UI, WebRTC
Databases & Cloud:	Supabase, Firebase, MySQL, PostgreSQL, REST APIs
Tools & Ecosystem:	Git, GitHub, VS Code, Linux/Bash, Postman, OpenAI & Whisper APIs
Executive Leadership:	System Architecture (CTO), Startup Operations (COO), Growth Marketing (CMO), Agile Sprint Management

DESIGN THEME PREFERENCE

Clean Apple-Style Dark Minimalist: Deep charcoal/monochrome background (#0B0F17), subtle high-contrast silver borders (#262C36), and crisp electric blue circuit line accents.
